## SECTION 7 – PREVENTIVE MEASURES

**PERSONAL PROTECTIVE EQUIPMENT:**

**Respiratory Protection:** If exposure exceeds occupational exposure limits, use an appropriate NIOSH approved respirator. Respirator selection must be based on known or anticipated exposure level, the hazards of product and the safe working limits of the selected respirator.

**Eye Protection:** Safety eyewear complying with an approved standard should be used when a risk assessment indicates this is necessary to avoid exposure to liquid splashes, mists, gases or dusts.

**Skin Protection:** Normal work coveralls. Impervious boots. Cover body with lab coat.

**Wear impermeable gloves. Butyl rubber gloves.**

**ENGINEERING CONTROLS:** Use process enclosures, local exhaust ventilation or other engineering control to keep airborne level below recommended exposure limits. If user operations generate dust, fume or mist, use ventilation to keep exposure to airborne contaminants below the exposure limit.

<b>HANDLING PROCEDURES:</b>	Store in tightly-closed container. Avoid contact with combustible materials.
<b>STORAGE REQUIREMENTS:</b>	Keep containers tightly closed in cool, dry and well ventilated place. Separate from acids, alkalis, reducing agents and combustibles.
<b>LEAK AND SPILL PROCEDURE:</b>	Safely stop source of spill. Restrict non-essential personnel from area. All personnel involved in spill cleanup should avoid skin and eye contact by wearing appropriate personal protective equipment.
<b>WASTE DISPOSAL:</b>	The generation of waste should be avoided or minimized wherever possible. Avoid dispersal of spilled material and runoff and contact with soil, waterways, drains and sewers. Disposal of the product, solution and by-products should at all times comply with the requirements of environmental protection and waste disposal legislation and any regional local authority requirements.

**SECTION 8 – FIRST AID MEASURES**
